

Auto Ticket Classification using Flow Designer

Additional Template Applicability Notes

Prepared from the project details available in this conversation and the supplied template archive. Unknown details are marked rather than assumed.

Tableau performance template

Not applicable as written: this project is ServiceNow Flow Designer, not a Tableau dashboard. Do not invent rendered datasets, filters, calculated fields, visualizations, or story counts.

Power BI performance template

Not applicable as written: no Power BI model/dashboard is part of this project.

Salesforce performance template

Not applicable as written: project is implemented in ServiceNow, not Salesforce. No Salesforce model accuracy figures apply.

Machine Learning / AI / GenAI performance templates

Not applicable: the project uses configured keyword conditions in Flow Designer, not a trained ML/AI/GenAI model. No accuracy, confidence score, API latency, or model performance metrics were measured.

Template handling

The supplied archive includes duplicate DOCX/PDF versions and technology-specific templates. This pack completes the project-relevant content and documents non-applicable technology-specific templates rather than fabricating results.
