

# Auto Ticket Classification using Flow Designer

## User Acceptance Testing (UAT) Report

Prepared from the project details available in this conversation and the supplied template archive. Unknown details are marked rather than assumed.

### Project overview

Project Name: Auto Ticket Classification using Flow Designer

Description: ServiceNow workflow to classify common school IT tickets and send confirmation email.

Version: Project Update Set exported to XML; version number not supplied.

Testing period: Exact dates not supplied.

### Testing scope

Ticket creation, automatic category/subcategory population for four configured issue types, and confirmation email generation/preview.

### Testing environment

ServiceNow PDI instance dev428996. Credentials intentionally omitted; do not include passwords in project documents.

### UAT test cases

UAT-01 Wi-Fi ticket: create "WiFi not working in library"; expected Network/Wi-Fi and email. User reported completed.

UAT-02 Projector ticket: "Projector not turning on"; expected Hardware/Projector. User reported completed.

UAT-03 Password ticket: "Forgot password"; expected Access/Forgot Password. User reported completed.

UAT-04 Slow computer ticket: "Slow Computer"; expected Performance/Slow Computer. User reported completed.

UAT-05 Email check: inspect generated email and preview. Preview showed configured message; external delivery not confirmed.

### Bug tracking

No unresolved defects were reported in the available project notes. Formal defect IDs/severity/sign-off were not supplied.

### Sign-off

Tester name/signature and product-owner approval were not supplied. Complete these fields with the actual authorized names if required by the institution.

## Actual Project Screenshots

The screenshots in this section are taken from the submitted project PDF and show the actual ServiceNow project configuration and testing evidence.

This screenshot shows the configuration page for an Incident WorkFlow named 'INC00511'. The page includes a header with navigation icons and 'Update' and 'Delete' buttons. The main form contains several fields: 'Number' (INC00511), 'State' (None), 'Assigned group', 'Assigned to', 'Caller' (Alfonso Griglen), 'Category' (Network), 'Subcategory' (Wi-Fi), 'Short description' (My college Has issue with Network), and 'Description'. A red box highlights the 'Number', 'Caller', 'Category', 'Subcategory', 'Short description', and 'Description' fields. Below the form are 'Update' and 'Delete' buttons.

## Actual Test Result Screenshot

This screenshot shows the configuration page for an Email workflow. A 'Preview Email' dialog box is open, displaying the email content. The dialog box includes a close button (X) and the following text: 'Hi greetings from xyz college ....!!!', 'We are viewed your request and solved by short time period., Thankyou ,', and 'Ref:MSG0000396\_ChBc6sAUD3zwGS0qINyn'. The background shows the email configuration form with fields for 'Subject', 'Recipients', 'Body', 'Content type', and 'Headers'. A red box highlights the 'Preview Email' dialog box. Below the form are 'Update' and 'Delete' buttons. At the bottom left, there is a 'Related Links' section with a link to 'Preview Email'.
